

## 豐源鋼構為廣東省名優產品

### 四川重建獲政府嘉許

本公司非常榮幸獲得中國中央政府賞識及信任，於零八年六月被委派為「四川地震救災安置房屋」項目材料供應及承建商，並獲頒發「廣東省名優証產品証書」以表品質合乎國家優質產品。工程為期兩個月，主要負責材料供應，加工及興建四川省青川縣救災過渡安置居住房屋、洗手間、廚房及學校，合共6200間，總面積高達12萬4千平方米。給予災難同胞在等待重建永久家園期間的安居之所，並讓學童們重返校園重新生活。

青川縣地處四川盆地，周邊山勢較高，安裝團隊須於最高海拔3837米，最低海拔491米施工地點作裝嵌，再加上各施工地點分散，在轉運距離遠，氣候變化大，物資及水源缺乏下另工程難度提高。

全憑豐源各部門上下一心，專業精神，團隊努力，工程得以順利完成。

## Feng Yuan Steel Structure Receives Government Recognition for Sichuan Earthquake Redevelopment Work

Feng Yuan Steel Structure received a recognition of honor from the Chinese government in June 2008 after participating the Sichuan Housing Redevelopment public works after the level 8 earthquake in Sichuan on 21 May 2008.

Feng Yuan Steel Structure was responsible for raw material purchasing, manufacturing steel structures and installation 6,200 pre-fabricated structures including living zones, kitchens, schools and toilets in Chinchuen. The total size of the construction site is 124,000 sq m. The purpose of the project is to quickly provide people displaced from the disaster an opportunity to return to a more normal lifestyle. Students can even return to school.

Chinchuen is a basin located in Sichuan, surrounded by high mountains. The whole team of over 500 Feng Yuan technicians worked in this high-altitude area of up to 3,837m above sea level. Moreover, the construction sites were separated into different zones, along with rapidly changing weather and the long distances between zones made the logistics of material transport difficult. The lack of materials and water in the construction sites made the whole installation harder.
